Error 1000
DNS points to prohibited IP

What happened?

You've requested a page on a website (online-boutiques.shop) that is on the Cloudflare network. Unfortunately, it is resolving to an IP address that is creating a conflict within Cloudflare's system.
Please see
https://developers.cloudflare.com/support/troubleshooting/http-status-codes/cloudflare-1xxx-errors/error-1000/ for more details.

What can I do?

If you are the owner of this website:
you should login to Cloudflare and change the DNS A records for online-boutiques.shop to resolve to a different IP address.
